

Programul internațional „Săptămâna Mondială a Spațiului”

➤ activități cuprinse în cadrul programului internațional Săptămâna Mondială a Spațiului, cu tema anului 2024 „*Spațiul și schimbările climatice*”/concursul „To the Moon and Back” pe site-ul <https://tothemoonandbackfromthemoon.weebly.com/>

Concursul de postere „To the Moon and Back”

Sam thinks that the Moon is made of cheese. Can this be true? Is it kept in the huge hole that Taffy the dog finds? Or is it something else in the crater that has caught Taffy's attention? Find out when RK-5, a pocket-size robot, magically transports Tommy, Sam and the rest of their friends to the surface of the Moon!

This activity has been included in the official World Space Week 2024 calendar.

The Shining Moon by Matei Jurj

One day I was playing hide-and-seek outside my house. My friends and I were playing at night for the game to be harder. This game is about hiding in any spot you like and not being found. When you see the opportunity, you need to run to where the seeker counted and yell one, two, three and then the name of the seeker.

The beautiful moon was shining intensely, and I couldn't stop watching it. I was hiding in a beautiful old tree waiting for the opportunity to jump out of the tree and not be caught. It was a full moon night when we decided to play. It was beautiful, the perfect set up for the game.

We were all looking at the beautiful shining moon... We were so mesmerized by it, that we forgot we were playing hide-and-seek! We admired the moon until I was the only one who was yet to be found. I ran as quickly as possible not to get caught and I yelled one, two, three. The game was over, and my friends all left. Since that night, I have looked at the moon more often.
